8 Electric Sideloader

12 Heavy Line Sideloader

References and fields of application

Home of strong sideloader brands

Founded as Schöberl & Söhne Motoren- und Maschinenfabrik in 1879, the company first built forklift trucks in the 1960s and later specialised in the production of JUMBO sideloaders in the 1980s.

By integrating technology and experience from the sideloader pioneers IRION, LANCER and the German SHS, BULMOR is able to offer customised solutions from a comprehensive range of sideloaders and multidirectional sideloaders with over 45 years of experience in the manufacturing of forklift trucks.

The sideloaders are extremely strong and are designed and produced at the Austrian headquarters according to the customer's requests and to specific applications.

Unique and solid construction

for extreme durability and stability

This Bulmor sideloader category fast and comfortably lifts loads of any sort weighing up to 8 tons. High availability and excellent durability are characteristic for these machines.

The exceptionally resilient lift mast, the inwards moved right front wheel, which allows for outstanding agility also while maximum steering angle, as well as the highly comfortable cabin form the basis for exceptional operations.

Performance without compromise

The new DQ series possesses the newest generation of motors and complies with all statutory provisions fulfils all statutory regulations.

Designed for easy maintenance

Modular mounting options

Optional extensions such as load bumper plates, steps, fire extinguishers or toolboxes can be readily fitted

Electric Sideloader

Highest performance

thanks to tried and tested, proven technology

This electric, silent and environmentally friendly sideloader impresses with low maintenance costs when compared to its diesel-powered counterparts. This category of Bulmor sideloaders lifts loads of all kinds weighing up to 8 tonnes, and is available in two series for best cost-effectiveness. Thanks to a low platform, our electrically operated sideloaders can also be used for optimum handling of low shelves.

- Suitable for indoor and outdoor use
- Quiet and economic
- Lower maintenance & maintenance costs

Electronic extension control

can be adjusted individually on site

High-dimensional AC drive motors ensure high driving

speeds and maximum traction

Quick battery replacement

thanks to one-piece trough

With a replacement battery multi-shift operation is possible

Very agile in the tightest of spaces

due to very compact outer dimensions

Recessed front wheel for tighter turning radius at full steering lock

Sideloader Heavy Line

Robust Bulmor design

guarantees highest stability

The big wheels, the high-performance drive and the exceptionally solid lift mast ensure power reserves when it comes to extraordinary applications. This machine category easily, comfortably and safely handles loads up to 20 tons.

Main fields of application here as well are the timber, steel, aluminium, plastics or the metal working industry.

As a matter of course, in this machine category as well, our focus is on highest standards. Safety, quality and durability are those values which bring about the reliability of our products.

FACTS		
lifting capa	icity	10 to 20 tons
engine		Diesel
drive		hydrostatic
platform he	eight	from 1.380 mm
platform w	idths	from 1.400 mm
lifting heigh	nts	up to 8,000 mm

Loads lifted with safety

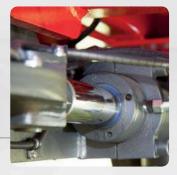

due to the solid lifting unit and the hydraulic tilting system on the side of the cabin

Massive mast and attachments

are manufactured in-house and oversized in order to meet the requirements of the toughest operational conditions.

Designed for heavy loading due to its solid steering axle

Timber, steel, aluminium, tubes etc. our machines master all kinds of operations in most diverse industries.

Glued laminated timber, profiles, pipes, steel – our machines handle any long and heavy material.

We offer comfortable and safe handling of goods.
